

How To Reduce Noise Pollution By Up to 80 Percent In And Enjoy Your Home Again

(Without losing the look or character of your period property)

Introduction

You know what it's like.

You sit in your beautiful home, with all its period charm and character. Just one thing gnawing on your mind. That nagging noise.

It could be the noise of cars, buses or lorries thundering by. The noise of aircraft flying overhead. The noise of the local industrial estate or works. Or just the general noise of the streets outside.

You can sit there, gritting your teeth or grumbling away. Or look to do something about it.

Did you know if you took action today you could be enjoying peace and quiet in your home again?

No more irritating background noise to spoil the conversation. No need to turn the volume up several notches on your TV remote. No need to sacrifice the character and charm of your property.

That's the beauty of secondary glazing.

On the next pages you will find a summary guide to the benefits of this cost effective solution to annoying noise - and the reasons why it's a better choice than double glazing.

Here's why secondary glazing is worth a closer look...

The Smart Home owner's Choice to Tackle Noise

The Smart Homeowner's Choice to Tackle Noise

Here is why secondary glazing (from Clearview) is a sensible solution:

Appearance:

- You keep your existing windows with all their character and traditional features intact.
- Recommended for **listed buildings** and **conservation areas**
- Unobtrusive design means your windows retain their period look

Performance:

- Improves the thermal efficiency of your window by **60-70 per cent**
- Helps keep the cold out and more heat in your home
- **Reduces your energy bills by up to 15 per cent a year**
- Secondary glazing lasts longer than double glazing (30+ years)
- High quality construction with a **10 year guarantee** on frames and glazing
- Every window is unique to your home - measured to the millimetre

Practicality:

- Quick and simple to fit - regardless of the weather
- Easy to clean
- Flexible range to suit virtually all single and double glazed windows
- Our Supply and Fit service only uses experienced secondary glazing specialists - it's the only thing they fit, week in week out

Price:

- More **cost effective** and better value than double glazing
 - Choose from DIY or specialist fitter options according to your budget
-

Additional Benefits:

- Reduces noise pollution in a room by up to **80 per cent**
- Up to **FIVE times better** at noise pollution than Double or Triple glazing
- Eliminates condensation
- Additional security for your home
- Better for the environment than double glazing
- No pushy salesperson seeking their next commission-based sale
- Tackles Condensation or Controls Condensation

Double Glazing vs. Secondary Glazing (Noise Reduction)

Use the comparison table below to help you decide what's right for you...

	Double Glazing	Clearview Secondary Glazing
Appearance	<p>Completely changes the appearance.</p> <p>Your existing windows are removed and replaced by modern plastic DG frames.</p> <p>Lose character, charm and any period features (including any stained glass).</p> <p>May look 'odd' set against neighbouring properties with a traditional period look.</p>	<p>Keeps your existing windows and period features safe.</p> <p>Unobtrusive glazing maintains the character appearance of your window.</p> <p>Suitable for listed buildings and conservation areas.</p> <p>In keeping with the neighbourhood.</p>
Noise Reduction (Performance)	<p>Does little to reduce noise (often no more effective than single glazing)</p>	<p>With right specification and acoustic glass, a 50dB reduction is possible (that is 5 times the performance of double or triple glazing)</p> <p>The equivalent of HALVING the noise entering your room or home.</p>
Price	<p>Replacement with uPVC window often MORE expensive than the repair and secondary glazing option.</p>	<p>Typically more cost effective and better long term value alternative to double glazing. DIY or specialist fit options.</p>
How long does it last?	<p>May last 20-30 years before the need to replace again.</p>	<p>Can last longer than 30 years</p>
Supply & Fitting	<p>Should only be fitted by a registered professional</p>	<p>Supply Only (DIY fitting) or Supply & Fit by specialist secondary glazing fitters.</p> <p>Can be fitted to double glazed windows</p>
Redecoration	<p>Redecoration required after fitting</p>	<p>NO redecoration needed</p>

Double Glazing vs. Secondary Glazing (Noise Reduction)

Use the comparison table below to help you decide what's right for you...

	Double Glazing	Clearview Secondary Glazing
Good for the Environment?	A heavy double glazed window unit uses THREE times the material of a secondary glazing unit. Your old windows usually end up in landfill. Work is messy and requires a clean up.	Uses three times LESS material than a double glazing equivalent. Contributes to carbon emission reduction. Simple and clean to install.
Listed Buildings	NOT usually permitted in listed buildings	Permitted and recommended
Conservation Area	May require planning permission	No need for planning permission
Impact on Property Value	May devalue a period property (and make it harder to sell in future)	Adds to value of property (retains character and period features; lowers noise levels)
Thermal Insulation	Can cut heat loss through windows by up to 50 per cent	Can increase thermal efficiency of a window by 60-70 per cent. An average property could save 10-15 per cent on their annual heating bills.
Condensation	Can reduce condensation if heating-ventilation balance is right	Eliminates condensation in almost all cases
Impact on Property Value	Irrevocably effects the historic value and fabric of the building	Completely reversible installation
